VERÖFFENTLICHUNGSPFLICHT
gemäß § 23c Abs. 6 Nr. 1 EnWG

Saalfelder ENERGIENETZE

DVGW-Codenummer: 9870026700004

Gasbeschaffenheit
Das Erdgas im Verteilernetz der Saalfelder Energienetze GmbH entspricht der 2. Gasfamilie Gruppe H nach den Anforderungen der DVGW-Arbeitsblattes G 260.

Referenzbrennwert:	**bis 31.07.2016:**	**11,100 kWh/m³**
	ab 01.08.2016:	**Abrechnungsbrennwert des Vorvormonats (Gasnetz Saalfeld/Unterwellenborn)**
Bei dem Referenzbrennwert handelt es sich um einen Durchschnittswert, der der Allokation von Entnahmestelle mit registrierender Leistungsmessung zugrunde gelegt wird und der für die Abrechnung der Netznutzung nicht relevant ist. Die Netznutzungsabrechnung erfolgt auf Basis des Abrechnungsbrennwertes.		

Abrechnungsbrennwerte Ausspeisezone „AZ Saalfeld"
Bei Entnahmestellen mit registrierender Leistungsmessung erfolgt die Abrechnung der Netznutzung zum monatlichen Abrechnungsbrennwert. Für Entnahmestellen, die nach Standardlastprofilen beliefert werden, wird ein mengengewogener Durchschnitt aus den monatlichen Abrechnungsbrennwerten des Abrechnungszeitraums gebildet; das DVGW-Arbeitsblatt G 685 „Gasabrechnung" sowie die Beiblätter zur G 685 finden entsprechende Anwendung.
